Best-VALUE in Simulation Engineering ASE, Inc. Delivers Two SR22 Simulators

ASE, Inc. Odessa, Florida announced completion of the design, manufacture, and installation of two Cirrus SR22 G-3 Simulators for the Dubai Aerospace Enterprise Flight Academy.

One unit was approved by the FAA as an Advanced Aviation Training Device on September 11, 2008. The second is a JAR 2A Level 2 Flight Training Device and was qualified in Ras al Khaimah, UAE on September 19. The FTD includes a 220° X 50° visual system. ASE conducted a flight test program to obtain the aerodynamic modeling and validation data package. Two more devices are scheduled for delivery to the DAE Flight Academy in January 2009.

ASE manufactures, markets, and supports flight simulator training devices (FSTDs) capable of worldwide regulatory approval. ASE also manufactures a series of digital electric control loading systems and 2-, 3-, and 6-DOF electric motion systems and offers full service flight test and model development services. By developing new technology, deploying an experienced business management team, and working collaboratively with our customers, ASE has developed a proven track record of on-time delivery, exceptional simulator performance, and customer satisfaction.
